

MARIO MARINO portfolio

Mario Marino

Born on September 1, 1967, in a small village at the foot of the Sila Greca mountains in Calabria. After graduating as a surveyor, he worked on the family farm and simultaneously attended the architecture program at the University of Florence, where he graduated in 2003 with a thesis on the static and dynamic monitoring of engineering structures. From 2003, he worked for three years as an adjunct professor at the Department of Construction of the Faculty of Architecture at the University of Florence. Meanwhile, he began collaborating with several architectural firms and working as a freelancer in Florence. In 2007, after two years working for the Municipality of Florence on projects developed using the participatory architecture method, he moved to Istanbul to work at the Turkish office of an architectural firm until December 2009. From that date until 2013, he worked in various architectural firms and contracting companies in Istanbul. From 2013 until December 2018, he worked as Head of the Design Office at Hitit Kontrat, a Turkish contracting firm based in Istanbul. In 2019, he moved to Lugano, where he worked until May 2023 as a coordinating architect and purchasing clerk for the international engineering and construction firm Mabetex Group in Paradiso, Lugano. Since June 2023, he has worked as a freelancer, mainly in Turkey.
